New Screen Magazine
No. 96 ✓

MMAGNESITE is a mineral noted for its heating resisting qualities. The steel industry is partially dependent on it and therefore magnesite is very carefully mined. Until it reaches its final form of refinement, the process is a long and arduous one.

Edward Kunowitz and Miss Helene Marie Saxova of the Pavlova Russian Ballet, display their art for this issue of the magazine, illustrating the Hungarian Rhapsody, the Mazurka and a Polish peasant dance.

Uncle Sam is a natural history expert. In the Smithsonian Institute at Washington, one of the world's greatest museums, bones of giants are put together, specimens of birds now extinct are "brushed up a bit," all sorts of animal models are made, and so on.

There is an amusing animated in New Screen Magazine No. 96, by Pat Sullivan, entitled Sammie White Presents Hissell in "Flap Jacks."
